**Tasty Nature**

## TAFLO WILL EXHIBIT AT CIBUS 2018

**TAFLO, a leading company in the production of organic dehydrated vegetables and free-from products, will present at CIBUS a new range of premium quality products for gourmet dishes**

Pojana Maggiore (Vicenza) – 4 May 2018. TAFLO, headquartered in the North East of Italy, where it is a leading company in the production and dehydration of fresh vegetables, will present its latest **AROMY® products** at the CIBUS International Food Exhibition taking place in Parma from 7 to 10 May 2018.

In its own **booth (C051, Hall 4.1)**, TAFLO will show its top products, highly appreciated in the organic and gluten-free food market: the original **Aromy Brodo mio vegetable broth**, a broth that you prepare the same way as tea, which will be displayed in the new area **Cibus Innovation Corner**, and **Aromy vegetable teas and decoctions**, a unique line of teas and decoctions made exclusively of organic vegetables. TAFLO will also showcase the new range of **dried IGP vegetables for risotto and gourmet dishes** in their elegant but functional packaging.

The company dehydrates many vegetables, including **superfood** such as black kale and pumpkin, but has specialized in dehydrating the renowned **red radicchio**, a variety of chicory with a pleasantly bitter and aromatic taste grown in the Italian region Veneto, and considered one of the most renowned Italian food products. TAFLO carefully selects and dehydrates fresh **Treviso, Chioggia and Verona IGP radicchio** (the three most popular radicchio varieties) at very low temperature, to enhance the nutritional value and organoleptic properties of fresh produce and make these delicious winter vegetables available throughout the year.

AROMY® products are 100% **natural** and **gluten-free**. They are ideal not only for people suffering from food intolerances, but also for vegan and vegetarian consumers. All the AROMY® products are **V-labelled** (vegan/vegetarian certified) and made exclusively of dehydrated vegetables of **Italian origin**. They contain **no salt, no glutamate, no chemical additives, no preservatives, no colouring** and are **GMO-free**. TAFLO is a certified organic company and a member of the Consortiums for the Protection of IGP Radicchio. **Highest quality** production standards and commitment to free-from food are among its key strengths.
